# Quick Setup Call Park

1/6/2015
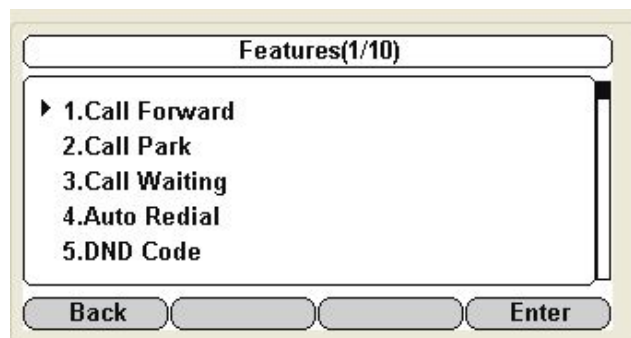

Content

Instruction

Call park:

Call park service allows user to suspend a call for an extended period of time and then retrieve that call from any extension. At present, FWD key is use for call park. For instance, when one who is answering a call wants to move to another location to take the current call, he/she can press FWD to park this call and retrieve the call in the target location. The call can also be parked when the phone is ringing by pressing FWD, inputting the target number, and then pressing OK.
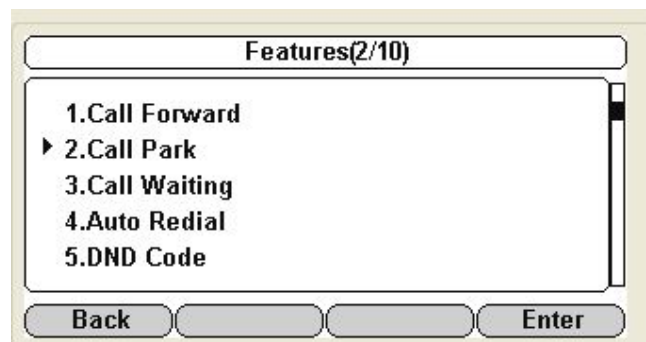

Configuration on Akuvox IP phones

1. Press Menu softkey ,then select Features:

2. Press OK or Enter to enter Features:

3. Press the down key and select Call Park:
